PHYS 105 — GENERAL PHYSICS I Course Code: 2300105

SYLLABUS

Textbook: Giancoli, Physics for Scientists and Engineers with Modern Physics, Global Edition, 5th Edition

Course activities: **ODTÜClass Course [PHYS 105 All Sections] GENERAL PHYSICS I**

Laboratory activities: **ODTÜClass Course [Phys 105, 111, 181 Labs] General Physics I Labs**

1. Examinations

There will be two midterm examinations, one final examination and one make-up examination. All examinations will be held face-to-face and graded by the instructors using the Gradescope program. Online examinations will not be provided upon request.

Examination	Date and Time	Coverage
First Midterm	31-Oct-2026, Saturday, 10:00-11:30	To be announced
Second Midterm	05-Dec-2026, Saturday, 10:00-11:30	To be announced
Final	04-Jan-2027, Monday, 09:30-11:30	All course content
Make-up Exam	11-Jan-2027, Monday, 19:00-21:00	All course content

Mobile Phones During Examinations

Students MUST NOT bring mobile phones into the examination room.

- In case you bring a phone, you must switch it off and leave it on the designated table at the front of the room before the examination begins.
- You are not allowed to keep a phone in your pocket, on or under your desk, in a bag near your seat, or anywhere within your reach.
- You are responsible for your phone and for collecting it after the examination. The Department and proctors are not responsible for any loss or damage.
- Any violation of these rules will be considered as cheating. (See Item 13 of this Guidelines.)

Prohibited Items and Conduct During Examinations

- Students are **NOT PERMITTED** to keep mobile phones, tablets, smartwatches, smartglasses, books, notes, scratch paper, **calculators**, backpacks, purses, or any other eelectronic devices and personal belongings on their desks, on adjacent seats, or on the floor near their feet during examinations.
- **Touching or using a mobile phone during an examination is STRICTLY FORBIDDEN.**
- **Any student who violates the mobile phone rule will have their phone and examination paper confiscated, will be required to leave the examination room immediately, and will receive a grade of ZERO for that examination.**
- Any student who violates the examination rules will be formally reported to their department and faculty in writing, with a request that **disciplinary proceedings be initiated against them**.

2. Eligibility for the Final Examination

The students can take the final examination with no restriction.

3. Grading

Component	Weight
First Midterm	25%
Second Midterm	25%
Final Examination	35%
Laboratory	10%
Attendance	5%
Online Homework	3% (Bonus)

4. Attendance

- Students are required to attend theoretical and practical classes, examinations, and other academic activities as specified by the Board of Instructors.
- At randomly selected class hours attendance may be monitored online through platforms such as ODTUClass or Pearson. Therefore, all students are required to attend their assigned sections with a device that has a reliable internet connection. Students are responsible for ensuring that their devices are charged and that their internet connection is working properly before attending class.
- Students who do not attend a class will be considered absent even if they provide a medical report. A medical report does not exempt students from the attendance requirement.
- After taking attendance, instructors may call the names of randomly selected students to check whether they are actually in the classroom. If a student is found to be absent, the student will receive **zero points for attendance**, and all previous attendance records will be cancelled.
- Students with an attendance rate of **60% or higher** will receive an attendance grade between **1 and 5**, calculated proportionally according to their attendance rate. Students with an attendance rate below **60%** will not receive an attendance grade.

5. Section Change Request

- Each student must register for the section assigned through METU-SIS.
- A section change may be requested only if the assigned section conflicts with the student's course schedule. Students with such a conflict must complete the **General Physics - Request for Section Change** on ODTÜClass within the announced application period.
- Section changes can be made only by the **Department of Physics**.

6. Laboratory

- To pass the lab a student must complete **all experiments** and have an average laboratory grade of at least **50**.
- Missing even one experiment or having a laboratory average below 50 will result in an **NA grade**.
- Laboratory sessions are held face-to-face.
- Laboratory information, groups, announcements, and grades are available in the ODTÜClass course **[Phys 105, 111, 181 Labs] General Physics I Labs**.

7. Repeating Students

- A repeating student whose previous laboratory average was below 50 must take the laboratory again.
- A student who completed all experiments and had a laboratory average of 50 or higher cannot take the laboratory again. The previous laboratory grade will be used when determining the letter grade.

8. Make-up Examination and Experiments

- A student may request a make-up examination for **only one missed examination**.
- The student must have a documented excuse and must apply through ODTÜClass during the announced period. All required documents must be attached. A medical report must be issued or approved by the **METU Medical Center**.
- The make-up examination covers the **entire course** and its grade replaces the grade of the missed examination.
- A student who misses more than one examination because of documented excuses receives an **I (Incomplete)** grade and must take a face-to-face examination covering the entire course.
- For a missed laboratory experiment, follow the instructions in the laboratory ODTÜClass course.

9. Withdrawing or Dropping the Course

- If a student withdraws from or drops the course, **all grades become invalid, including laboratory grades**.
- Laboratory work completed during that semester cannot be used later. Students who withdraw from or drop the course should stop attending laboratory sessions.

10. Online Homework

- Online homework is assigned through **Pearson Mastering Physics** via ODTÜClass.
- A homework score from 50 to 100 gives **1 to 3 bonus points**, calculated on a proportional basis. A homework score below 50 results in no bonus points.

11. Course Activities and Announcements

- Course activities are managed through the ODTÜClass course **[PHYS 105 All Sections] GENERAL PHYSICS I**.
- Laboratory activities are managed through the ODTÜClass course **[Phys 105, 111, 181 Labs] General Physics I Labs.**
- Announcements will be posted on ODTÜClass.
- Students must check ODTÜClass regularly.

12. Information for Students with Disabilities

Students who experience difficulties due to a disability and wish to receive academic adjustments and/or auxiliary aids should contact the ODTU Disability Support Office, the course instructor, and/or the departmental advisor for students with disabilities as soon as possible.

For the list of departmental advisors, please visit:
http://engelsiz.metu.edu.tr/en/advisor-students-disabilities

For more information, please visit the ODTU Disability Support Office website:
https://engelsiz.metu.edu.tr/en/

13. Academic Integrity and AI Tools

- Students must follow METU's academic integrity rules. Any form of academic misconduct will be handled according to the METU Disciplinary Procedures referred in the METU Academic Rules and Regulations Governing Undergraduate Studies.
- Cheating or any attempt to cheat in examinations will be reported to the Faculty of Engineering for disciplinary action. The use or attempted use of mobile phones or any other digital equipment (smart watches, smart glasses etc.) is strictly forbidden and will be treatedas an attempt to cheat or as cheating.
- AI tools may be used for learning when they are used responsibly and ethically. They must not be used for cheating or other forms of academic misconduct.

14. Academic Honesty

The METU Honor Code is as follows: "Every member of the METU community adopts the following honor code as one of the core principles of academic life and strives to develop an academic environment where continuous adherence to this code is promoted. The members of the METU community are reliable, responsible, and honorable people who embrace only the success and recognition they deserve, and act with integrity in their use, evaluation, and presentation of facts, data, and documents."

15. Important Note

- The Board of Instructors may revise these guidelines.
- Students must follow the latest announcements on ODTÜClass.
